

Paving the Way for Rain

Watershed-Friendly Permeable Pavement Choices

Learn from industry experts how to use watershed-friendly **Permeable** Concrete, Asphalt, Pavers, and Reinforced Grass pavement in driveways, parking lots, patios, and sidewalks

Workshop & Technical Training

Wednesday March 14, 2007

8:00 am - 12:15 pm: Overview Workshop

1:15 pm - 5:00 pm: Technical Sessions

Wharfinger Building

Eureka Public Marina, Waterfront Drive, Eureka, CA

Pervious Concrete

Advantages of Permeable Pavements:

- Minimize stormwater runoff
- Reduce need for storm drain systems
- Provide filtration of pollutants
- Increase infiltration to groundwater
- Even eliminate puddles!

Topics include:

- Types of permeable pavements
- Benefits
- Appropriate Applications
- Performance
- Design & Installation
- Cost & Availability
- Maintenance

Permeable Pavers

Sponsored by the California Coastal Commission & the North Coast Stormwater Coalition.
Partially funded through State Water Resources Control Board, Proposition 50.

Registration required by March 1 for free workshop & training sessions
